

| DON BOP Strategic Objective   | Initiative Text  | OPR        |
|---|--|------------|
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Improve infrastructure project delivery across the installations portfolio in order to recover force generation, projection, and sustainment capabilities  | ASN (EI&E) |
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Address munitions of explosive concern (MEC) on Guam and the CNMI to mitigate construction cost and schedule impacts   | ASN (EI&E) |
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Support Defense Policy Readiness Initiative (DPRI) and Indo-Pacific readiness through execution of Joing Region Marianas Portion of DPRI   | ASN (EI&E) |
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Apply the full range of authorities to business operations and infrastructure investments at Marine Corps and Navy installations to reduce operating costs and pursue new opportunities for the delivery of facilities and services.                         | ASN (EI&E) |
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Understand and improve capability and capacity of DON organic industrial base infrastructure to improve depot throughput, reduce operating costs, and support future force structure   | ASN (EI&E) |
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Understand and improve the capability and capacity of DON ordnance magazines at each ordnance installation to meet the Global Requirements Based Load Plan   | ASN (EI&E) |
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Complete required actions necessary to secure or expand DON real estate holdings to enable force generation requirements at key aviation (El Centro, Fallon, BMGR) and ground-based training ranges/complexes (29 Palms)                                     | ASN (EI&E) |
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Integrate and deploy "small-cellular" and 5G wireless broadband technologies on DON CONUS installations in order to enhance command and control capabilities, and improve the quality of life for personnel and dependents living on base                    | ASN (EI&E) |
| 1.2.C Develop and implement a sustainable path to infrastructure modernization  | Improve installation resilience posture for energy, utilities, and environment in order to increase DON mission assurance at key mission critical facilities   | ASN (EI&E) |
| 1.3.B Increase DON's ability to deter, detect, defeat and recover from cyber-attacks  | Improve DON mission assurance posture of operational technology (facility related control systems) by completing an inventory of systems and implementing plans, processes, and tools in order to identify, track, respond to, and mitigate vulnerabilities. | ASN (EI&E) |
| 3.1.B Reform business operations enterprise-wide to generate lasting, institutionalized, resources to support strategic reinvestment in lethality | Develop and implement the Governance strategy to enhance DON oversight of privatized housing programs, and work with partners to improve the financial viability of DON MHP initiatives and business operation construct                                     | ASN (EI&E) |
| 3.3.A Institutionalize annual audit and remediation, and establish a near term path to a clean opinion  | Establish valuation baseline and implement sustainable processes to properly account for real property assets<br><br><i>OPR: FM&amp;C / EI&amp;E</i>   | ASN (EI&E) |
