

Department of Defense Appropriations Act, 2007

Aircraft Procurement, Navy

For construction, procurement, production, modification, and modernization of aircraft, equipment, including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway, \$10,393,316,000, to remain available for obligation until September 30, 2009.

"In accordance with the President's Management Agenda, Budget and Performance Integration initiative, this program has been assessed using the Program Assessment Rating Tool (PART). Remarks regarding program performance and plans for performance improvement can be located at the Expectmore.gov website."

<p>GENERAL PROGRAM DESCRIPTION This sub-line provides for the transition of current Automatic Test Equipment (ATE) Test Program Sets (TPSs) to AN/USM-636(V) Consolidated Automated Support System (CASS) and the acquisition and modification of common ATE to meet fleet operational requirements identified in the fleet concurred Common Support Equipment Operational Requirements List.</p> <p>TEST PROGRAM SETS (TPSs) TRANSITION TO CASS TPSs are SE that consist of the hardware, software, and documentation required to automatically fault detect and isolate electronic units under test (UUTs) to the defective sub-component and Ready for Issue (RFI) the component. Existing ATE that can no longer be economically supported will be offloaded to CASS based on fleet priorities. This budget requests funds for the procurement of TPSs to offload support from existing obsolete ATE to CASS, as well as support of GFE requirements including UUT and CASS stations at CASS TPS Test Integration Facilities.</p> <p>COMMON ATE ACQUISITION AND MODIFICATION System acquisition and modification is necessary to replace obsolete and unsupportable equipment, support current technology, incorporate necessary reliability and maintainability improvements, and correct Fleet reported problems as a result of Engineering Investigations/Quality Deficiency Reports for out-of-production common ATE. Without these modifications replacement parts will not be available and common ATE will not remain operational.</p>												
* Due to multiple Requiring Financial Managers (RFM's) in prior years, detailed breakout of prior year data is not available.

<p>General Program Description: This budget sub-line provides for the acquisition of Support Equipment (SE) end items under the inventory and technical management of NAVAIR. These SE end items are required for ground testing handling, and maintenance of aircraft and their systems. Examples of SE items acquired under this budget line item include aircraft propulsion test systems, mobile air conditioners and generators and aircraft handling equipment.</p> <p>Also included are common avionics support equipment (ASE) items which are too complex technically to be transitioned to the inventory control point for acquisition. The ASE included is managed by NAVAIR and supported through the Navy Inventory Control Point.</p>

<p>General Program Description</p> <p>This budget sub-line funds the procurement of end items of Peculiar Support Equipment (PSE) for out-of-production weapon systems, and Common Support Equipment (CSE) under the budget, procurement, and inventory control of the Naval Inventory Control Point (NAVICP). PSE and CSE end items are normally introduced into the fleet through NAVAIR development, and initial procurement. When design is stabilized and procurement packages are available, these items then migrate to NAVICP management, and are funded under this sub-line. NAVICP currently manages over 11,000 individual repairable SE end items. This subline also funds initial outfitting of new construction ships.</p> <p>This sub-line also provides for the replacement of certain in-use PSE that are now marginally effective, due to obsolescence, or to the unavailability of associated logistics support. As a consequence, a logistically supportable replacement item must be designed and produced. This budget sub-line provides replacement of PSE support for out-of-production aircraft requirements only.</p> <p>In addition, this sub-line provides for the completion of the design and production of: (1) certain PSE items that were not funded during the production phase of the weapon system, and (2) modifications to out-of-production aircraft PSE to extend its useful service life.</p> <p>NAVAIR is responsible for the design, and initial production of the items cited above. When each is fully qualified, NAVICP will assume material management responsibility for the item.</p>												

* Due to multiple Requiring Financial Managers (RFM's) in prior years, detailed breakout of prior year data is not available.

COST (In Millions)	*		74,978	79,400	82,248	84,223	86,100	87,890	105,564	111,176	Continued	Continued
<p>Program Coverage: The ACAT II Consolidated Automated Support System (CASS) program is chartered to replace the Navy's inventory of 30 + different types of computer-based Automatic Test Equipment (ATE) with a single modern, cost effective COTS/NDI based ATE system, and has been designated as the Navy's Standard Family of ATE. There are five configurations of CASS which support the entire spectrum of electronics testing requirements from direct current to light: Hybrid [tests digital and analog], Radio Frequency (RF) [tests radars and electronic warfare systems], Communications Navigation IFF (CNI), Electro-Optics (EO) [tests FLIRs and LASERs] and Reconfigurable Transportable (RTCASS) [a man-transportable version of RF CASS]. CASS supports intermediate and depot level repair of aircraft, ship, submarine and other weapon system electronics. CASS performs fault detection and diagnostic testing of almost 3,000 different "black boxes" and associated circuit cards from F/A-18A/B/C/D/E/F, T-45, AV-8B, S-3, EA-6B, H-60, H-3, E-2, C-2, and V-22 as well as several NAVSEA/SPAWAR weapon systems.</p> <p>Justification: CASS replaces older, legacy ATE systems that have become obsolete (parts are no longer available) and too expensive to maintain. CASS reduces afloat CV/CVN ATE manning from 104 to 54 billets and reduces the size of the AVCAL (spare parts) from 30,000 to 3,500. CASS also reduces technician Naval Enlisted Classifications (NECs) types, along with their training courses, from 32 to only 5. Each CV will deploy with 18 - 20 CASS stations and each LHD/LHA will deploy with 3 stations. CASS is utilized at Aircraft Intermediate Maintenance Departments (AIMDs) afloat and ashore, at USMC Marine Aviation Logistics Squadrons (MALs), and at Navy Fleet Readiness Center (FRCs). RTCASS supports USMC V-22 and fixed wing aircraft.</p> <p>Current and budget year requirements are needed for CASS introduction in support of the following new and transitioning systems:</p> <p>New Requirements: F/A-18E/F (multiple), MIDS (F/A-18), V-22, ATFLIR (F/A-18), CEC (E-2C), MH-60R/S (multiple systems), UH-1Y and AH-1Z, AN/ASN-139 (multiple aircraft), EGI (multiple aircraft).</p> <p>Transitioning Legacy Testers: 20 legacy automatic testers that support Navy and USMC tactical air aircraft.</p> <p>Modernized Mainframe CASS Stations (MOD MF CASS): Initiated mainframe CASS station modernization in FY-05 to modernize older CASS stations to the newer baseline configuration. Phase I will modernize the CASS Block I stations (mid-1980s technology), and Phase II will modernize Block II CASS stations (early 1990s technologies). Modernized Mainframe CASS Program will employ a modern test architecture to facilitate insertion of test technologies required by changes to supported weapon systems and to enable resolution of obsolescence issues.</p> <p>Other Costs: CASS-associated requirements include the following: (1) incorporation of Class I ECPs generated through RDT&E and other programs to permit systematic insertion of new technology to meet requirements of new weapon system avionics (RTCASS downsized high power[RTCASS HP] and inertial navigation capabilities), (2) incorporation of test technologies required to offload Test Program Sets (TPSs) from legacy ATE, (3) efforts to ameliorate obsolescence and improve system reliability, maintainability and supportability, (4) rehosting existing TPSs to leverage increased capabilities of new software technology, (5) providing support of CASS installation requirements at fleet sites afloat and ashore, (6) maintaining items contractually provided to contractors as Government Furnished Equipment, (7) maintaining supporting equipment used at CASS laboratory and testing facilities, and (8) providing ancillary equipment necessary for functionality of CASS.</p> <p>* Due to multiple Requiring Financial Managers (RFM's) in prior years, detailed breakout of prior year data is not available.</p>

<p>Program Description: Mobile Facilities (MFs) budgeted in this sub-line consist of basic equipment: 8'X8'X20' shelters, Modular Rigid Wall Shelters, Environmental Control Units, legacy Mobile Electrical Power generators which are being replaced with Tactical Quiet Generators. Also 60HZ Frequency Converters, Power Distribution Boxes, power cables, spreader bars, stacking blocks, scaffolds, slings, caster jacks, lashes, buckles, and associated publications and manuals. NAVAIR acts as the Primary Inventory Control Activity (PICA) for multi-service procurement of NAVAIR Mobile Facilities and related ancillary equipment.</p> <p>Program Coverage: The requirement for this equipment is directed toward fulfilling Navy and Marine Corps Aviation requirements. The basic concept is to provide containerized aviation logistics support to the operational commander that can be rapidly deployed by all transportation modes to any location in the world. Operationally, the MFs provide the Navy and Marine Corps with a quick response stand-alone capability to meet worldwide operational commitments. Economically, the MFs eliminate the need for "brick & mortar" construction, and allows for world wide transportability.</p> <p>Justification: This sub-line will meet the ultimate goal of housing all Marine Corps Aviation intermediate-level logistics support in MFs in accordance with the Table of Basic Allowance for Fleet Marine Forces Aviation Units and fulfill specific Navy Aviation mobile logistics requirements as outlined in individual Weapon System Planning Documents (WSPDs).</p> <p>* \$3,800M OF TITLE IX IS INCLUDED IN FY06 CONTROLS.</p>

COST (In Millions)	*	A	189.341	156.301	207.794	190.366	158.040	144.223	140.483	143.518	Continued	Continued
<p>Common Ground Equipment – Training provides aircrew and aviation maintenance training systems in two categories:</p> <p>General Training Equipment provides for the procurement of aviation training systems, including training devices and associated courseware, which are not associated with a specific aircraft platform. As required, includes modifications and updates to reflect changes in technology or operating environment.</p> <p>Justification of Major Programs: The Maintenance Computer Based Training program's emphasis is on Fleet In-Service Training with its Aviation Maintenance Training Continuum Spectrum (AMTCS) Software Module (ASM) developed in support of training and readiness by integrating all training, training management tools, and associated infrastructure through an Automated Software Management Tool that tracks technical training across an individuals career. The Air Combat Training System (ACTS) provides Post Fleet Replacement Squadron (FRS) level Advanced Distributed Learning (ADL) for Aircrew. The Aircraft Firefighting program will procure mobile aircraft firefighting training systems for advanced skills training and for fleet damage control personnel. The Air Traffic Control (ATC) program provides the necessary simulated training for control tower operations, Carrier Air Traffic Control Center (CATCC) operations, Amphibious Air Traffic Control Center operations and advance radar operations. The 'A' School program's current focus is PC-Simulations to replace hardware training devices, curriculum content conversion to self-paced web delivered training, and electronic classroom systems to support delivery of training in the Integrated Learning Environment (ILE). The Naval Aviation Survival Training program provides mission critical training systems and systems support for Navy and Marine Corps aircrew and select DoD personnel</p> <p>Modification/Modernization of Trainers provides for acquisition and updates for training systems supporting out-of-production aircraft.</p> <p>Justification of Major Programs: The Chief of Naval Aviation Training (CNATRA) program will provide a technical refresh to the T-45 simulator and will continue T-45 Operational Flight Trainer (OFT) acquisition and the TH-57 Service Life Extension Program (SLEP). The Undergraduate Naval Flight Officer (UNFO) Training program acquires high fidelity weapons system simulators for UNFO training Rehost of the E-6 2F144 visual system. The EA-6B 15E34B Refresh replaces aging/unsupportable trainer system components. The F/A-18 program will focus on simulator concurrency with the parent platform and refreshing key simulator sub-systems including visual systems, databases, threat models and aerodynamic properties. The Fleet Aircrew Simulator Training (FAST) Plan provides for trainer procurements and major upgrades to address Fleet (post-FRS) training requirements. P-3 will provide a simulator technical refresh in support of the Fleet Replacement Squadron (FRS). Procurement of two (2) Ch-53E High Fidelity Simulators.</p> <p>* Due to multiple Requiring Financial Managers (RFMs) in prior years, detailed breakout of PY data is not available.</p>

DESCRIPTION: This budget line item funds two programs: Aircraft Industrial Facilities & The Calibration Equipment

Aircraft Industrial Facilities:

NAVAIR owns two active, contractor operated aircraft manufacturing plants and several hundred acres of environmentally contaminated land at two former plants. NAVAIR is the environmental permittee at three sites, legally responsible for environmental compliance including cleanup of offsite private property contaminated by activity originating on NAVAIR property. All NAVAIR property is in the process of disposal, but federal law requires environmental cleanup to be complete and fair market value to be paid if property is sold - which are parts of the disposal process not controlled by NAVAIR. Therefore final disposal dates are uncertain. This budget funds costs associated with property ownership including management of existing leases at operating facilities. Termination of funding prior to divestiture would cause NAVAIR to violate Subchapter C of the Federal Management Regulations, Federal Environmental Laws and NAVAIR Contracts.

Calibration Equipment Description:

Calibration Equipment funds are used to procure Calibration Standards (CALSTDs) and ancillary equipment for Aviation Fleet Intermediate Calibration Activities, Fleet Training Activities, Aviation Navy Calibration Laboratories (NCLs), and the Navy Primary Standards Laboratory (NPSL). CALSTDs procured for Fleet 'I' level use are to replace obsolete and/or irreparable equipment, expand technical measurement capabilities to decrease Depot support costs, reduce out-of-service turn around times, provide enhanced forward deployed geographic support and reduce/control the NAVAIR cost of ownership associated with Calibration. Fleet 'I' level calibration activities support 70% of the total Fleet calibration workload. Maintenance of Fleet calibration capability through this funding results in the release of more expensive Depot level support man-hours for more complex calibration maintenance and calibrations where economy of scale costs dictate single site or geographic calibration center capability. CALSTDs procured for NCLs and the NPSL allow for the automation and improvement of calibration procedures in order to reduce Fleet asset out-of-service and Turn around Time, expand technical calibration capabilities for enhanced in-theater Fleet support, and replace obsolete and high support cost CALSTDs.

\$3.746M in Hurricane Katrina supplemental funding for Calibration Equipment is included in FY06 totals

BUDGET ITEM JUSTIFICATION SHEET P-40											DATE: February 2007	
APPROPRIATION/BUDGET ACTIVITY APN-BA7 AIRCRAFT EQUIPMENT AND FACILITIES						P-1 ITEM NOMENCLATURE 072000 WAR CONSUMABLES (J7C5)						
Program Element for Code B Items: 0204164N/0204161N						Other Related Program Elements: (Project 3189) Digital I-TER RDT&E: 0205633N (Project 3190) Multi-Purpose Bomb Racks						
WAR CONSUMABLES												
	Prior Years	ID Code	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY2013	To Complete	Total Program
Quantity												
Cost (\$M)	\$473.6	A	\$18.8	\$39.7	\$65.4	\$92.4	\$75.2	\$61.1	\$58.2	\$57.1	Cont	Cont

The WAR CONSUMABLES P-1 line item has two subcategories: Common Aircraft Armament Equipment (AAE) and Aerial Refueling Stores (ARS). The Common AAE program procures common bomb racks, peculiar bomb racks, launchers, External Fuel Tanks (EFT) and related support for USN/USMC platforms. The ARS portion procures aerial refueling stores.

COMMON AIRCRAFT ARMAMENT EQUIPMENT (AAE)

As directed by OPNAVINST 8000.16, this project corrects deficiencies and provides quantitative sustainment for Aircraft Armament Equipment having multiple aircraft applications. The appropriation provides for procurement of new AAE to replace attrition losses, provides for production engineering support, and satisfies commonality policy goals set forth by the Navy's Strike Warfare Master Plan. Specifically, the following equipment is procured in AAE:

- Missile launchers and launcher upgrades to be used on AV-8B, F/A-18A-D, and AH-1W/Z aircraft.
- the Pure Air Generating System (PAGS) is an on-board coolant generator for IR seeking missiles.
- Replacement External Fuel Tanks for F/A-18, S-3, and EA-6 required to meet the Fleet Response plan and replace original equipment due to fatigue issues.
- Bomb Rack Upgrades to include reliability improvements to the BRU-33 and BRU-55.
- Multi-Purpose Bomb Rack procurement beginning in FY10. This new rack will replace the BRU-41/42/33/55 and provide use for both tactical and training stores on one common rack.
- Digital ITER procurement beginning in FY10. This rack will add multiple carriage capability for smart weapons, such as JDAM, on the AV-8B.

AERIAL REFUELING STORES (ARS)

The ARS program, finances Aerial Refueling Systems. Requirements are determined by an inventory objective, which supports peacetime/wartime needs. Aircraft equipped with the A/A42R-1 Aerial Refueling Stores (ARS) are required for all carrier based tanking missions (overhead tanking (primarily recovery focused), strike, and yo-yo tanking). Total reliance on the ARS and integration to the F/A-18E/F requires substantial improvements to the existing stores to ensure their viability through 2040. Investigation of major subsystems in pursuit of life cycle cost savings, mitigation of flight safety risk, and reliability enhancements have identified a large dollar value return on investment for service life extension, reduction in flight safety risk, and areas where reliability improvements can be realized.

****FY06 FUNDS FOR WAR CONSUMABLES IN THE AMOUNT OF \$15,307K IS SUPPLEMENTAL AND \$3,485K IS A CONGRESSIONAL ADD**

****FY07 FUNDS WAR CONSUMABLES IN THE AMOUNT OF \$34,916K IS SUPPLEMENTAL AND \$4,781K IS A CONGRESSIONAL ADD**

DESCRIPTION: The Other Production Charges line provides funds for various production support and testing services, aircraft cameras, aircraft pods, and instrumentation packages supporting tactical aircrew combat training and mobile sea range systems. The budget request supports the following efforts:

COMMON AVIONICS DECEN.
Programmatic and technical support for in-production avionic systems.

TACTICAL COMBAT TRAINING SYSTEM (TCTS)
The TCTS program will procure fixed, transportable, and mobile range equipment for the Navy for both shore-based (aircrew training) and deployable (ship/aircrew training) applications. TCTS instrumentation will transmit exercise scenarios: simulate/stimulate all exercise participants sensors and weapons with the exercise scenarios; track all exercise participants and events, e.g., weapons engagements; and provide accurate, realistic, and timely exercise feedback. TCTS is building on technology developed for existing tactical training range systems. This procurement primarily acquires airborne instrumentation participant subsystems for F-18/AV-8B Internal Subsystem (IS), Rotary and Transport Aircraft Rack-mounted Subsystem (RS), and other tactical aircraft Airborne Subsystem (AS). Beginning in FY09, Joint Tactical Radio System (JTRS) compliant data link transceiver retrofit kits will be procured to replace the non-compliant data link transceiver and to provide other performance enhancements.
