Subject: URGENT UPDATE - PLEASE READ BEFORE PURCHASING NEW AFFF - Chief Alert 2015-29 -- Fire Extinguishing Agent, Aqueous Film-Forming Foam (AFFF) -- Qualified Product List (QPL)
Date: Friday, February 19, 2016 8:37:08
Importance: High

URGENT UPDATE - PLEASE READ BEFORE PURCHASING NEW AFFF

BLUF: When ordering AFFF you must specify "AFFF must meet military specification MIL-F-24385 and has C6 chemical formulation."

- Our goal is to purchase an "EPA Compliant" AFFF for all new apparatus; therefore the AFFF must have a C6 chemical formulation.
- It is also important to note the MILSPEC (military specification) "MIL-F-24385" is all about the AFFF's fire extinguishing performance, and NOT whether the AFFF is a C6 formulation.
- Not all AFFF type listed on the QPL have a "C6" chemical formulation.
- When ordering AFFF you must specified the AFFF meets the MILSPEC "MIL-F-24385" and has "C6" chemical formulation.

(b) (6), thanks for your question. I'm reply to all.

If the truck is new yes; both; if expected to be used for POL fires. An exception would be the structural trucks is used for other purposes, such as wildland and they may have a different foam.

Chief,

Does this apply to both new ARFF and structural trucks? Or just the ARFF trucks?

(b) (6)

v/r,

(b) (6)

Product List (QPL)

Chief, attached pdf is a quote for 3% C-6 AFF. Quote runs between \$119 - \$140 depending on the brand ordered.

Remember only new C-6 will be used the new trucks.

Subject: Chief Alert 2015-29 -- Fire Extinguishing Agent, Aqueous Film-Forming Foam (AFFF) -- Qualified Product List (QPL)

Chief Alert 2015-29 -- Fire Extinguishing Agent, Aqueous Film-Forming Foam (AFFF) -- Qualified Product List (QPL); see attachment New C6 AFF.doc.

Audience: All F&ES

Chiefs, the following Fire Extinguishing Agent, Aqueous Film-Forming Foam (AFFF) Liquid Concentrate, for Fresh and Sea Water meeting the governing specification and approved are listed on the Qualified Product List (QPL): updated on 15-Dec 2015.

- ONLY QPL approved AFFF will be used to replace existing AFFF (old) stock piles.
- Disposition instructions to replace stockpile of OLD AFFF will be determined after data call is complete.

Regions/Installations receiving new apparatus

- New apparatus will be filled with ONLY QPL approved C6 AFFF.

- TOA for new apparatus is one truck fill, plus two refill loads on-hand or in station storage or AFFF trailer.
- Do not mix old and new foams.

Note 1: The new C6 AFFF has an expiration date, so it is important to track the date foam tanks filled, brand of foam used, the percentage, and the date the foam manufactured. We will figure out automated tracking system later.

Note 2: If funds are needed to implement immediately (do not place old foams in new trucks) send a RAM for the amount require and we will re align funds from HQ.

Note 3: The current QPL list can always be viewed by anyone by going to quicksearch.dla mil, typing "24385" into the "Document Number" box, click search, click "QPL-24385-35 NOT 1", then click " View QPD data" towards the bottom of the page. <http://qpldocs.dla.mil/search/parts.aspx?qpl=1910>
