---

All,

See below and attached. Ensure all AFFF purchased from this point forward is on the QPL.

Chief Ferguson,

Find out the capacity of AFFF for the new ARFF 3000. We need to fill the new truck with the new MILSPEC AFFF.

**Subject:** Chief Alert 2015-29 -- Fire Extinguishing Agent, Aqueous Film-Forming Foam (AFFF) -- Qualified Product List (QPL)

Chief Alert 2015-29 -- Fire Extinguishing Agent, Aqueous Film-Forming Foam (AFFF) -- Qualified Product List (QPL); see attachment New C6 AFF.doc.

Audience: All F&ES

Chiefs, the following Fire Extinguishing Agent, Aqueous Film-Forming Foam (AFFF) Liquid Concentrate, for Fresh and Sea Water meeting the governing specification and approved are listed on the Qualified Product List (QPL): updated on 15-Dec 2015.

- ONLY QPL approved AFFF will be used to replace existing AFFF (old) stock piles.
- Disposition instructions to replace stockpile of OLD AFFF will be determined after data call is complete.

Regions/Installations receiving new apparatus

- New apparatus will be filled with ONLY QPL approved C6 AFFF.
- TOA for new apparatus is one truck fill, plus two refill loads on-hand or in station storage or AFFF trailer.
- Do not mix old and new foams.

Note 1: The new C6 AFFF has an expiration date, so it is important to track the date foam tanks filled, brand of foam used, the percentage, and the date the foam manufactured. We will figure out automated tracking system later.

Note 2: If funds are needed to implement immediately (do not place old foams in new trucks) send a RAM for the amount require and we will re align funds from HQ.

Note 3: The current QPL list can always be viewed by anyone by going to quicksearch.dla mil, typing "24385" into the "Document Number" box, click search, click "QPL-24385-35 NOT 1", then click " View QPD data" towards the bottom of the page. <http://qpldocs.dla.mil/search/parts.aspx?qpl=1910>
