WASHINGTON DC 20350-1000

Oct 30, 2009

MEMORANDUM FOR DISTRIBUTION

SUBJECT: FY 2009 DoD Value Engineering (VE) Performance Metrics and FY 2010  
VE Program Plans

The Department of Navy (DON) Value Engineering (VE) Program is a vital program to reduce costs, increase quality and improve mission capability across the DON and the individual warfighter. DON VE programs reported over \$130M in savings in FY 2008.

The attached Under Secretary of Defense Acquisition, Technology and Logistics memorandum of 5 October, 2009 is forwarded for development and submission of the FY 2009 VE Performance Metrics and FY 2010 VE Program Plans.

Coordination between program offices and contracting agencies is highly recommended to capture both organic-initiated Value Engineering Proposals and contractor-initiated Value Engineering Change Proposals savings and/or cost avoidance.

Please submit the VE Performance Metrics and VE Program Plans in electronic format through Taskers (DCN 2009UGENERAL – 019814c) to the Office of the Deputy Assistant Secretary of the Navy (Acquisition and Logistics Management) by November 21, 2009. My point of contact is Mr. Frederick J. Beata at (703) 614-9638 or frederick.beata.ctr@navy.mil.

David F. Baucom  
RDML, SC, USN  
Deputy Assistant Secretary of the Navy  
(Acquisition and Logistics Management)
